Overview - Receivables

RECEIVABLE MODULE

This module contains the Accounts Receivable (AR) entry options for various receivables transactions such as receipts and real-time GL posting.

MENU NAVIGATION

Sub-menu items of RECEIVABLE MODULE are listed below:

The **RECEIVABLE MODULE** has 3 tabs, as shown above, namely, Operations, Report Queries, and Settings.

AR OPERATIONS is where transactions are entered, like receivable transactions and opening balances.

REPORT QUERIES contains all the account receivable reports.

SETTINGS is where the master records are created.
