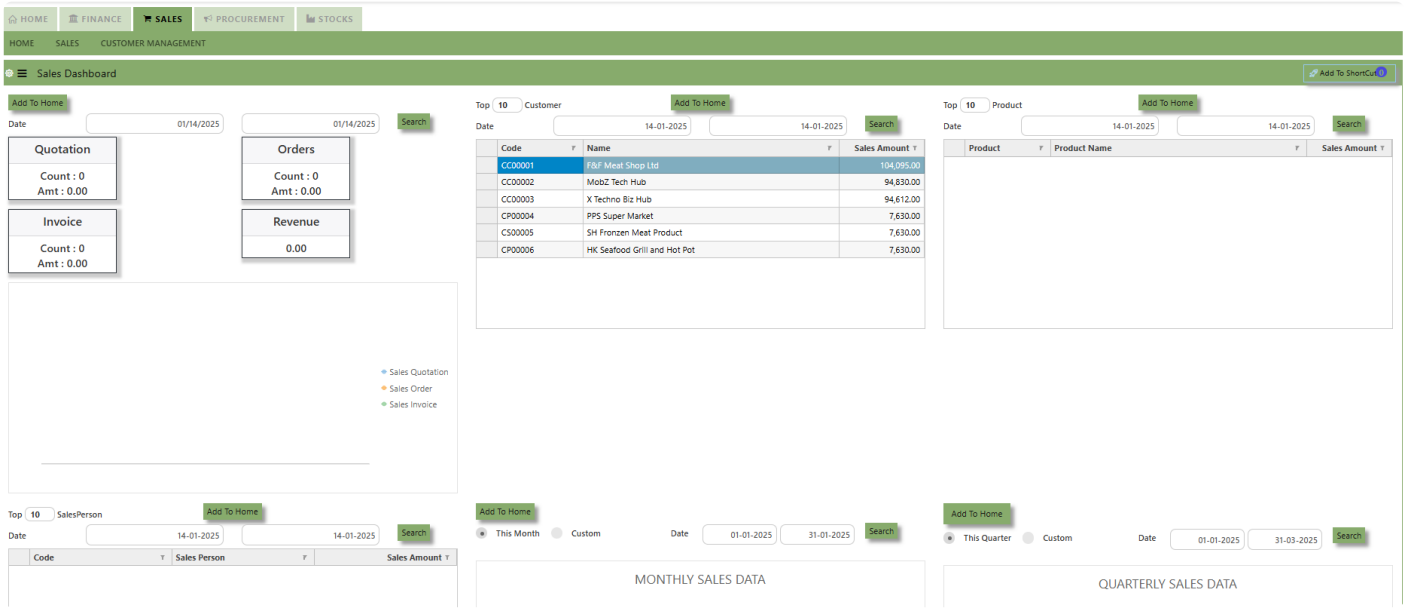
Overview - Sales Module

The SALES Module is the Operation Module of UNIQ365. The Sales Module in UNIQ365 is the place where all the Sales transactions take place. Uniq 365 is able to handle the various Sales methods to cater to all the needs of the organization. In this section, we will explore the different types of entries made and how these entries affect the ledger as well as the inventory accounts.

MENU NAVIGATION

Sub-menu items of Sales Module are listed below:



The SALES Module has 3 tabs, as above is showing as Home, Sales, and Customer Management.

- **Home** is the Sales Dashboard visual representation of key sales metrics and performance indicators. It provides real-time insights.
- **Sales** are where transactions are entered, like Customer Quotation, Customer Sales Order, Delivery Order, Customer
  Invoice, Goods Return Credit Note & Debit Note etc.

- **Customer Management** is where all the masters and main settings for Sales module are create.
